

# DRENAGH PATH TO PARADISE

Koppers Performance Chemicals' Celcure AC500 has been used to treat a raised pathway that leads holidaymakers to a picturesque beach on the north west coast of Ireland.

The kilometre long boardwalk connect exclusive holiday development 'Cuan Na Ri' to a sandy beach in Sheep Haven Bay, County Donegal.

The path was sourced from locally sustainable forests and produced and supplied by local sawmill, Drenagh Sawmills. The timber was selected, cut and dried before being preservative treated at the sawmill's HQ in Limavady, Co. Londonderry,

Colin Molloy, Koppers Performance Chemicals' Business Director for Ireland, commented: "The resort is located on

the 2,500 Km "Atlantic way" which runs from North Donegal to West Cork and which is home to some of the most amazing scenery. The path traverses the sand dunes on the way to a stunning 5km beach".

"It's as open to the elements as it's possible to get with the timbers used having to cope with regular footfall as well as the weather blowing in from the Atlantic.

"Timber treated with Celcure AC-500 preserved wood is protected against

attack by wood decaying fungi and wood destroying insects.

"Celcure AC-500 preserved wood, treated to an appropriate specification, can be used for structural timber, sole plates, garden furniture, playground equipment, patios, decks, fencing, garden edging and landscaping structures.
